We enable our customers to succeed by delivering state-of-the-art solutions to cyber-security challenges

1

Expertise and talent

2

Pragmatic and proven methods

3

Asset-based consulting

OUR SERVICES TO CYBER-SECURITY

Security assessment

- Clear, fact-based insights about your security maturity and risks
- Diagnostic solutions that identify your vulnerabilities and determine the areas for improvement
- Rigorously track the progress of security initiatives

Cyber-security incident response team (CSIRT)

- Prepare for handling potential incidents and crisis
- Immediately respond to an emergency or security breach
- Learn from past incidents to improve your resilience

Security advisory

- High-value and timely advisory solutions to overcome your security challenges
- From strategy & compliance through architecture down to complex technical issues
- Very-specialized expertise, assets, tools and methodologies

Secure development & implementation

- Develop highly-secure and resilient solutions to support your business
- Build up software factories that embed security in the delivered products
- Integrate security solutions and implement security management tools

Security training & coaching

- Tailor-made trainings for organizations
- Trainings & certifications to individuals
- Individual coaching (short term) and mentoring (long term)

Security operations & support

- Delegate the management of your security and compliance to seasoned and equipped experts
- Security staff augmentation & professional services
- Maintenance & support services for secure solutions

2001
ESTABLISHED

APPROACH AT A GLANCE

APPROACH is a consulting company specialised in cyber-security and secure developments. Established since 2001, we enable our customers to succeed by providing state-of-the-art solutions to cyber-security challenges.

Thanks to our unique spectrum of expertise, we propose a global approach to cyber-security. We offer services & solutions covering the full value chain of cyber-security, from governance down to deep technical design, architecture and implementation. APPROACH's service offering covers the whole lifecycle of information security and risk management, from assessment and advise, through secure implementation and operations, to training and coaching services.

Our offices are located nearby Brussels, closely to the university of Louvain-la-Neuve, in an innovative and green business centre. APPROACH is easily reachable from any point of Belgium and Europe.
