

JAVA DEVELOPER

**Do you want to boost your skills and join the Belgian leader in cybersecurity?
We are looking for new talents!**

Do you recognise yourself below? **Don't wait and apply!** We will get back to you within seven working days.

About us

Founded in 2001, Approach is **the Belgian leader in Cybersecurity**, held by a world-renowned shareholder, building **trust** for businesses in the digital world. Leveraging a large pool of certified professionals in GRC, Cybersecurity and development, we strengthen businesses' cybersecurity and resilience posture by adopting a risk-based and layered security strategy.

Our customer base's diversity offers **our consultants a unique opportunity** to work on **multiple innovative and challenging projects with cutting-edge technologies and tools** according to **their background and interests**.

Our **fast sustainable growth**, our **leading position** and **international ambition** also offer **great internal career opportunities** driven by our practice leaders and career counsellors.

Join Approach and you will become a **member of our Cybersecurity competence centre**. At Approach, we don't view certifications as a marketing artefact. We are **always investing in our talents**, offering training and coaching them to develop their skills. Our people are all **certified professionals who aim to build their knowledge continuously**.

By joining Approach, you will also have the **advantages** of working in a **human-scale company where each individual makes the difference in a healthy and pleasant atmosphere**. Our team counts 80 people and promotes **excellence**, close **collaboration** through regular team meetings, direct communication and feedback, dynamism, and fast decision-making.

Our offices are located in **Louvain-la-Neuve** and the city centre of **Antwerp**, offering you a job next door with either a wide range of amenities (restaurants, fitness centre, childcare nursery...) in a traffic jam free zone or a great view of the Scheldt river.

Your Role

In the context of our fast-growing company, we are looking for a **Java Developer** to integrate our Secure Delivery practice. You will take part in stimulating consulting assignments and secure development projects and your main tasks will consist of:

- You are a key player in the development of complex IT projects.
- You develop high quality secure software, assuring the highest possible stability, performance, readability and maintainability.
- You will be in charge of technical analysis, development, test, documentation and maintenance of new applications.

Your Responsibilities

Your role will consist of several activities, among which:

- Develops his/her competencies and level of expertise by a continued and ongoing progression and actively participates in training sessions in according with his/her approved Training Plan.
- Respects the confidentiality of both client and company information.
- Acquires the fundamentals of the consulting role in regard to analytical capacity, ability to see the overall picture, both written and oral expression, information verification.
- Is recognised by the client as being professional in own area of expertise.
- Demonstrates his/her capability to work in a team and portrays a positive attitude.
- Is recognised as being trustworthy by his/her project leader or client: precision of information, respect of the commitments, quality of the work, respects the deadlines, adequate reporting, ...
- Capitalises on the experience acquired within the Practice.
- Utilises or learns the tools or methodologies of the Practice and actively contributes to the development of these tools and methodologies.

Required Qualifications & Experience

You have:

- At least 2 years of work experience in Java/JEE software development is a must
- A first experience with IT Security concepts such as Federated Identity (SAML, OAuth, digital signature, OpenID) and application security is highly desirable
- Familiarity with SOA and/or micro services architecture
- Good knowledge of SOAP and REST APIs
- Strong self-motivator and entrepreneurial pro-active attitude
- Adaptive, strong analytical and problem-solving skills
- Good inter-personal contacts, team player
- FR-EN or NL-EN (trilingual is a plus)

Considered as a plus:

- Knowledge of frameworks such as Spring, Struts, WSO2, etc.
- Front-end skills (HTML, CSS, Javascript, AngularJS, etc.)
- Knowledge of cryptography (PKI)

Personality

- Organized and self-driven
- Fully autonomous: able to prioritize activities, plan and execute
- Pro-active / curious
- Excellent communication skills
- Eager to learn
- Uncompromising integrity
